

Customer Insights & Revenue Analytics

Uncovering spending patterns and customer behavior

PROJECT SCOPE

Dataset Overview

3,900

Total Purchases

18

Data Columns

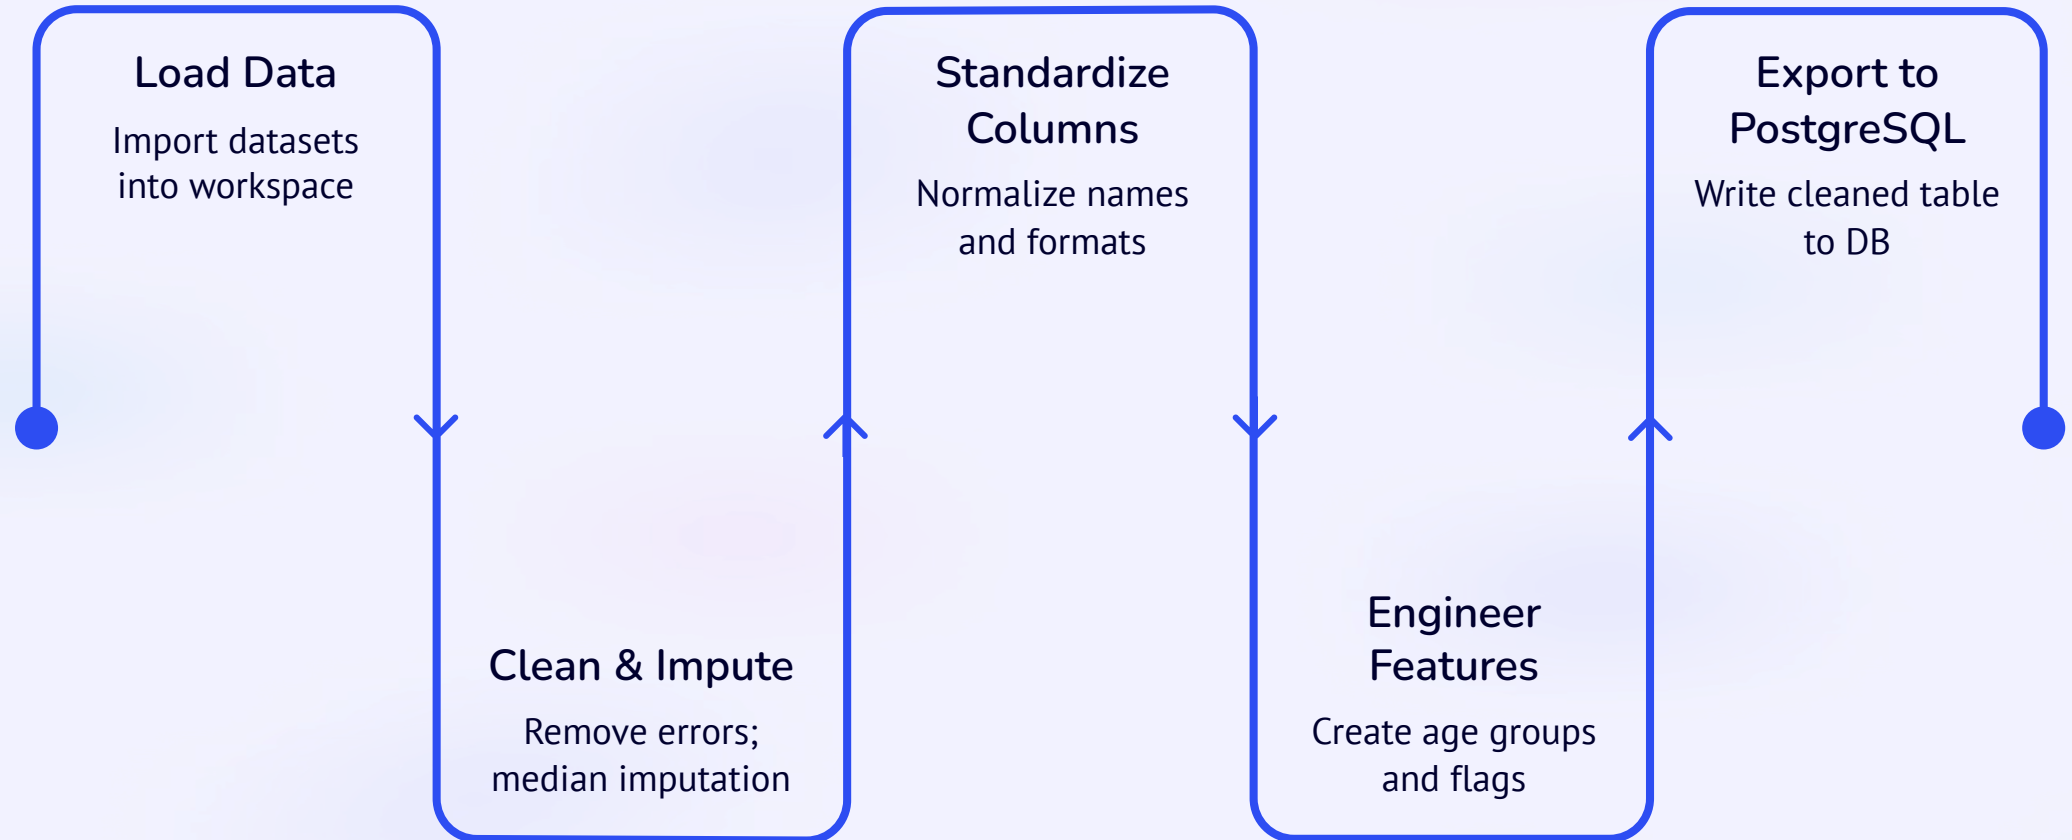

50

Locations

Key Features Analyzed

- Customer demographics & subscription status
- Purchase details & product categories
- Shopping behavior & review ratings
- Discount usage & shipping preferences

Python Analysis Pipeline

Cleaned dataset with median imputation for missing ratings, standardized naming conventions, and engineered age groups for deeper segmentation analysis.

Revenue by Gender

Male Customers

\$157,890 total revenue

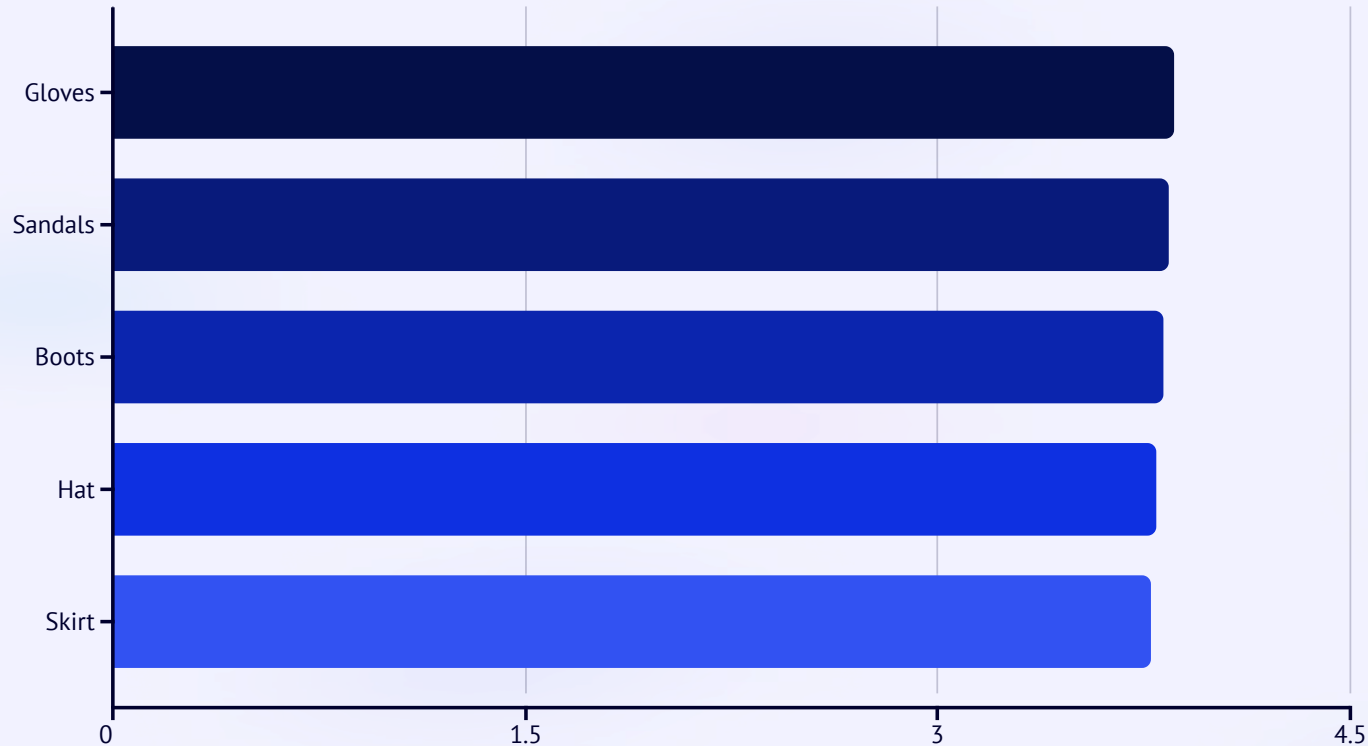

68% of total sales

Female Customers

\$75,191 total revenue

32% of total sales

Top Performing Products

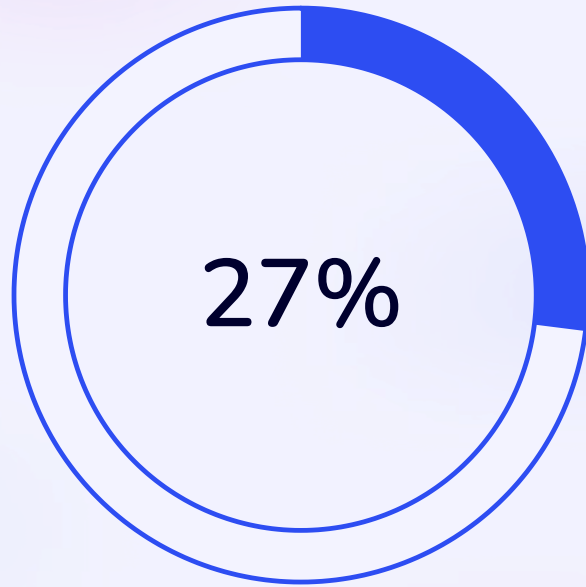

Customer Satisfaction Leaders

Products with highest average review ratings show consistent quality across categories.

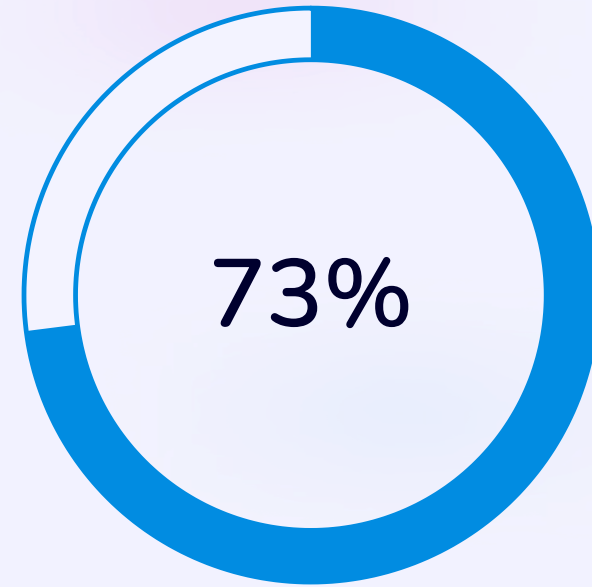

Gloves and Sandals lead with ratings above 3.8, indicating strong customer approval.

Subscription Impact Analysis

Subscribers

1,053 customers

Non-Subscribers

2,847 customers

Average Spend Comparison

Subscribers: **\$59.49**

Non-subscribers: **\$59.87**

Minimal spending difference suggests untapped subscription value potential

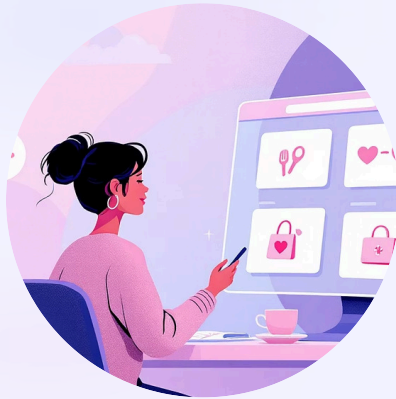

Customer Loyalty Breakdown

Loyal Customers

3,116 customers

80% of customer base

Returning Buyers

701 customers

18% of customer base

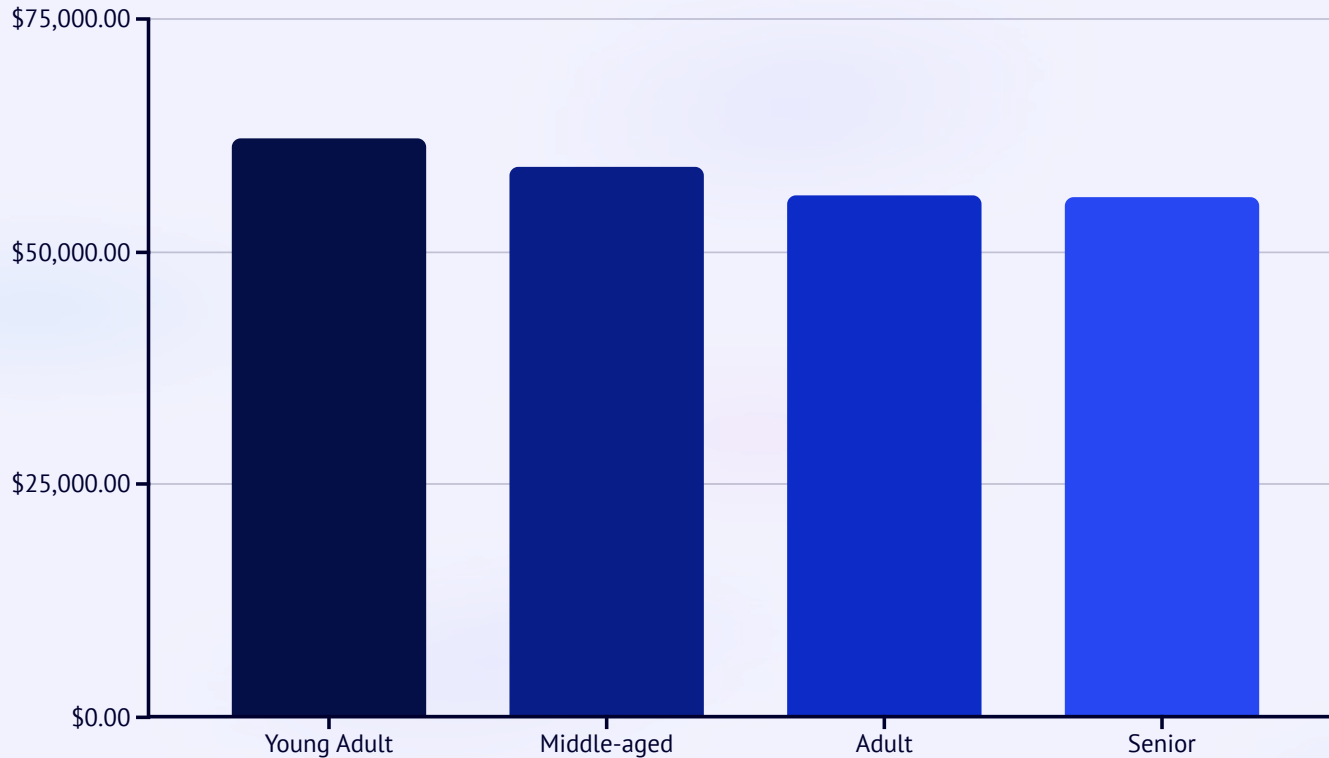

New Customers

83 customers

2% of customer base

Revenue by Age Demographics

Key Insights

Young Adults drive highest revenue at \$62K, representing prime target demographic.

Relatively balanced spending across all age groups indicates broad market appeal.

Strategic Recommendations

1

Boost Subscriptions

Promote exclusive benefits to convert non-subscribers

2

Loyalty Programs

Reward repeat buyers to strengthen retention

3

Review Discount Policy

Balance sales growth with margin protection

4

Product Positioning

Highlight top-rated items in marketing campaigns

5

Targeted Marketing

Focus on high-revenue age groups and express shipping users
